

HNRS 3025: THE MISSISSIPPI RIVER DELTA

Fall 2021

TTH 1:30-3:00pm, 218 FH

**Dr. Clint Willson
Dr. Granger Babcock**

**For LASAL Scholars, or by
permission of instructor.
Please contact Dr.
Babcock if you are
interested.**

The Mississippi River Delta is one of the most important deltaic systems in the world, but it is vanishing at an alarming rate, making LOUISIANA vulnerable to relative sea-level rise. Learn how our desire to control and manage the river has led to a series of consequences that now amplify the effects of climate change.
