

HONORS 2033 HUMAN- ENVIRONMENTAL SYSTEMS

Spring 2020
TUE & THUR
10:30 to 11:50

Humans have been altering our environment since before we were humans

The environment has been altering us for just as long

We will discuss the history of these human-environment interactions over the past 12,000 years

Topics Include: the Neolithic revolution, industrialization, energy and climate, population growth, & ecological economics
